PROFESSIONAL SUMMARY

Product Designer / iOS Developer with 8+ years of experience designing mobile apps, SaaS interfaces, design systems, landing pages, pitch decks, App Store assets, and brand systems for founders, startups, and product teams.

Strong Figma expertise across user flows, wireframes, high-fidelity UI, interactive prototypes, Auto Layout, components, variables, styles, responsive layouts, and scalable design systems. Experienced in translating ambiguous product goals into clear, structured, implementation-ready interfaces.

AI-enthusiastic designer using ChatGPT, Cursor, Codex, and Claude Code to accelerate UX exploration, product documentation, UX copy, prototyping, iteration, and handoff. Comfortable working in Agile environments with engineers, product managers, founders, and cross-functional stakeholders.

Known for high ownership, detail-oriented execution, calm product thinking, and the ability to design polished experiences that balance user needs, business goals, and technical feasibility.

PROFESSIONAL EXPERIENCE

Independent Product Designer / iOS Developer

2016 – Present

Freelance / Remote · Lima, Peru

- Delivered mobile app, SaaS, landing page, design system, brand system, pitch deck, and App Store asset work for founders, startups, and product teams.
- Translated ambiguous product goals into user flows, wireframes, high-fidelity Figma interfaces, prototypes, and implementation-ready handoff files.
- Built scalable Figma systems using Auto Layout, components, variables, styles, reusable patterns, and structured documentation.
- Collaborated with founders, product managers, engineers, and stakeholders to align product direction, visual design, interaction patterns, and delivery constraints.
- Applied AI-assisted workflows with ChatGPT, Cursor, Codex, and Claude Code to accelerate UX exploration, product documentation, copy iteration, and prototype refinement.
- Maintained strong client satisfaction across remote work, including 100% Job Success, Top Rated Plus status, 5.0 rating, 126 completed Upwork jobs, and 1.1K hours.

Product Designer / Founder

2025 – Present

Bricks Calc · iOS Mortgage Planning App

- Designed and built Bricks Calc, a mortgage planning app for estimating payments, comparing scenarios, understanding amortization, and planning shared housing costs.
- Led product design for core flows including mortgage calculation, saved calculations, amortization schedules, extra payments, expenses, refinance scenarios, split payment, notes, reminders, and settings.
- Created a calm financial UX system with reusable components, structured layouts, clear hierarchy, and practical guidance for complex mortgage decisions.
- Designed Split Payment workflows that help co-owners understand shared monthly payments, expenses, extra payments, and who paid what.
- Used App Store Connect, Firebase, Apple Ads, and ASO reports to improve onboarding clarity, product messaging, conversion paths, and feature discoverability.
- Collaborated across design and implementation as both product designer and iOS developer, ensuring design quality, technical feasibility, and consistency from concept to shipped product.

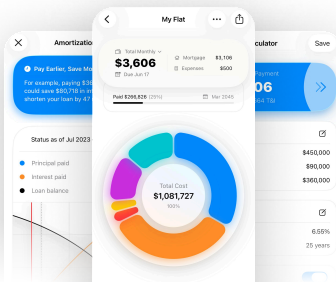

Product Designer / Founder

2026 – Present

Bricks Scan · Private Document Scanner App

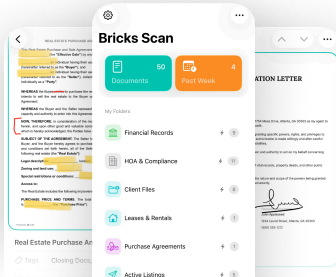

PROJECT HIGHLIGHTS

Bricks Calc — Mortgage Planning for Shared Decisions

- Designed a financial planning system for users making complex housing decisions individually or with partners/co-owners.
- Created Split Payment flows that clarify shared monthly payments, extra payments, expenses, and contribution tracking.
- Designed onboarding, app preview messaging, App Store promotional concepts, paywall logic, and localized UX copy for English and Spanish LATAM.
- Used analytics-informed decision-making to improve onboarding clarity, product messaging, conversion paths, and feature discoverability.

Bricks Scan — Private Document Scanner with OCR and AI Summaries

- Designed a document workflow from scan/import to OCR review, AI summary, organization, reminders, and export.
- Created a privacy-first product experience for users who need to capture, understand, and manage documents efficiently.
- Designed AI-assisted summary flows that support faster document understanding without making the experience feel overly automated.
- Structured the product around document organization patterns including folders, tags, rules, reminders, and export options.

CV — Freddy Díaz

Product Designer focused on scalable product experiences, Figma systems, and AI-assisted design workflows.

CORE SKILLS

Product Design: UI/UX Design, Interaction Design, User Flows, Wireframing, High-Fidelity UI, Interactive Prototyping, Mobile App Design, SaaS Dashboards, Landing Pages, App Store Assets

Figma: Auto Layout, Components, Variables, Styles, Design Systems, Prototyping, Responsive Layouts, UI Libraries, Developer Handoff

UX Strategy: User-Centered Design, Information Architecture, Usability, Accessibility, Product Consistency, Conversion-Oriented UX, Funnel Review, Systems Thinking

AI-Assisted Workflow: ChatGPT, Cursor, Codex, Claude Code, Prompt-Driven Iteration, AI-Assisted UX Copy, AI-Assisted Product Documentation, AI-Assisted Prototyping Support

Collaboration: Agile / Scrum, Product-Engineering Handoff, Stakeholder Communication, Design QA, Remote Collaboration, Client-Facing Delivery

Technical Context: iOS Product Development, SwiftUI, Xcode, App Store Optimization, Firebase, App Store Connect, Analytics-Informed Product Iteration

TOOLS

Figma, FigJam, ChatGPT, Cursor, Codex, Claude Code, SwiftUI, Xcode, App Store Connect, Firebase, Apple Ads, TestFlight

EDUCATION

University Degree — Aeronautical Engineering
UNEFA — Universidad Nacional Experimental Politécnica de la Fuerza Armada. Venezuela · 2009

LANGUAGES

Spanish — Native
English — Advanced Proficiency
